

How do personal care services help my practice?

Personal care services are an affordable option that offer a wide range of services to patients at home or in a medical facility. Our program offers private duty nursing (skilled) services.

Every patient's recovery is different. Some require ongoing care, while others need service for only a few hours each week. Personal care services are available 24 hours a day, seven days a week to help patients and families attain the quality of life they deserve.

We offer a multidisciplinary team of high-quality caregivers, and promise an exceptional level of professionalism and customer service for your patients.

Services offered include:

Private duty nursing:

- Wound care
- Enteral and parenteral feedings
- Medication management
- Nutrition counseling
- Medication injections
- IV therapy
- Catheter care and changes
- Oxygen use and safety
- Use of air compressor, hand-held nebulizer and MDI

Contact your local provider today for more information.
