

How do I talk to my patient about personal care services?

When it's time for rest and comfort, there truly is no place like home.

This is especially true when managing the challenges of a chronic disease or recovering from an illness or injury. Personal care services help patients maintain their independence in the comfort and privacy of home. Our program offers private duty nursing (skilled) services.

Private duty nursing is provided by an LPN/LVN or RN. They work one-on-one with patients who require long-term skilled medical care.

Care can be provided 24 hours a day, seven days a week, 365 days a year. We work with patients and families to tailor caregiver schedules specifically to your needs.

Services include:

Private duty nursing:

- Wound care
- Enteral and parenteral feedings
- Medication management
- Nutrition counseling
- Medication injections
- IV therapy
- Catheter care and changes
- Oxygen use and safety
- Use of air compressor, hand-held nebulizer and MDI

Contact your local provider today for more information.
